AZALEAS

We specialize in growing Japanese and Kurume Azaleas, as our climate and soil are very well adapted to the raising of these beautiful plants. The Azaleas we offer are well grown under ideal conditions and are healthy and vigorous. A visit to our nursery, or a trial order will convince you of their high quality.

Azaleas thrive best in a well-drained, loamy, acid soil and require very little attention; however, they should not be allowed to become dry.

The Kurume varieties are excellent for winter forcing and the plants we offer are especially well budded and shapely, grown for the florist trade, and force very easily.

Our Azaleas have a wonderful root system with the soil intact and are shipped with a ball of earth.
